

**InstalSoft** over the years has grown to be the leading company creating design supporting software for MEP & HVAC engineering. Our products are intended directly for designers, as well as for companies active in the sector.

**InstalSystem 5** is professional CAE/CAD software supporting BIM for designing and sizing MEP & HVAC installations in 2D and 3D environment, including heating, cooling, sanitary systems, mechanical ventilation, as well as thermal calculations.

 **INSTALSYSTEM**

## Offer for Partners

---

Our offer is addressed to producers of systems and their components. InstalSoft offers unique support of its Partners' business with its advanced possibilities of customizing InstalSoft databases and programs.

Let us surprise you how easy and comfortable it may be to initiate cooperation and what a great amount of possibilities of its enhancement the InstalSoft products portfolio offers! **Ask for a free, dedicated offer** based on the analysis of your company's assortment and needs!

## Catalogues/database of Partners' products in the InstalSoft programs:

---

- Presence of catalogues in our programs means wide-scale promotion of the Partner's systems and products. You do not need to have your own customized software version to gain profits from maintaining your catalogues, as they are present in various configurations of the software, e.g. in the full InstalSoft version!
- Assortment of products maintained in catalogues destined for various markets may be unified or diversified in any possible way, according to the Partner's needs.
- EN-international catalogues (English language version, international assortment), with no additional payment, may be available in all 26 market versions offered by InstalSoft!

## Partners' customized software versions:

---

- **Available in amounts ranging from a couple of licences for internal use only to a mass distribution** among external designers.
- Program graphic customization – Partner's graphic design (corporate identity colours, logo, program names, ...).
- Possibility to deliver the program in various markets (currently, InstalSystem 5 is already available in 26 market versions). Possibility to transfer project files between market versions.
- Customization in scope of modules and catalogues available in the software.

# Many Partners from various countries have already trusted us!
